Memo to Non-Coal File:

RE: Kolt Mining Company
Milford Project
ACT/001/006
Beaver County, Utah

On December 3, 1982 the DOGM review team comprised of Cy Young, Dave Darby, Pam Grubaugh-Littig, Tom Portle and Sue Linner participated in an on-site inspection of the proposed Kolt Mining Milford Project. Accompanying the review team were Lloyd Wall, president of Kolt Mining, and two other individuals associated with the project. The team was given a complete walk-over of the proposed mine-site, including inspections of five exploratory pits. The mining will include removal of overburden, mining and processing of the ore for recovery of noble metals and reclamation upon termination of mining. Total surface area to be disturbed is estimated at 329 acres.

Water for mining purposes will be hauled from Rock Corral Springs. The proposed site for collection of this water was looked over by the review team. All in all, the team seemed impressed with the proposal and the advance planning being done by Kolt Mining. Preliminary comments on the proposal have been sent to Kolt Mining and any further comments, including hydrology, will be forwarded as soon as they are completed.
